# About us

Caleyá Forrajes takes more than 25 years in haylage and fresh forages production for equine sector.

We have a large team of professionals specialized in animal nutrition. That's why we offer you high quality fresh forage and haylage.

Of our total production, more than 70% is exported to numerous countries around the world.

We have controls in all production processes:

- ✓ Election of seeds.
- ✓ Cultivation control.
- ✓ Monitoring and health control of plantations.
- ✓ Harvesting of products at their optimum time.
- ✓ Transport to packaging factories.
- ✓ Quality and transability controls.
- ✓ Fermentation process
- ✓ Packaging.
- ✓ Storage and commercialization.

***“ We carry out an exhaustive follow-up to all production processes. From seed to delivery of forage to the final consumer. ”***

*\* No Prohibited Substances, as defined by the FEI, BSJA or Jockey Club rules, were intentionally used in the manufacture of this product.*

### MCHE 250 Original

Natural Forage

- Multi-particle fresh food in the form of «chaff» for horses and ponies in maintenance and soft work.
- Supplement for horses in competition.
- Formulated according to the general condition of the horse.
- Higher energy content and less protein.
- Helps in the development of work capacity.
- Extra intake of essential amino acids for muscle development.
- Contributes to digestive health as it is a fresh forage food.
- Enriched with vitamins and trace elements.
- Suitable for horses at risk of laminitis.

**Ingredients:** Extra green corn haylage, oat grain, barley flour, extra alfalfa hay, vegetable fats (sunflower oil...), cane amino acids and Vitamin and Mineral Complex.

**Composition:** Crude protein 10%, gross fat 5.80%, sugar

4.10%, starches 22%, gross fibre 25%, raw ash 5%, digestible energy 11.2Mj/kg, humidity 32%, lysine 6gr/kg, threonine 5.8%, methionine 2.7gr/kg, calcium 0,9%, phosphorus 0,4%, sodium 0,45%

MAINTENANCE		SOFT WORK		WORK MEDIUM/HIGH
Weight	Consumption	Weight	Consumption	
200 kg	1,1 kg	200 kg	1,5 kg	Add + 0.5 kg – 1 kg of your usual concentrated food.
400 kg	2,2 kg	400 kg	2,5 kg	
600 kg	3,1 kg	600 kg	3,5 kg	
The recommended amounts will depend on the quality of the forage and the type of work.				

30Kg

### MCHE 550 Xtrem

Natural Forage

- Multi-particle fresh food in the form of chaff, natural and powder-free.
- Ideal for horses that practice more strenuous sports.
- High-energy fiber, which provides effective slow-absorbing energy, keeping your horse working at a steady pace.
- Very rich in essential amino acids for muscle and physical capacity development.
- It helps in the digestion and absorption of nutrients, with a total digestibility above 70%.
- Enriched with vitamins and trace elements.
- Suitable for horses at risk of laminitis.

**Ingredients:** Extra green corn haylage, oat grain, barley grain, extra alfalfa hay, alfalfa haylage, vegetable fats (sunflower oil...), cane molasses, includes essential amino acids, vitamin and mineral complex.

**Composition:** Crude protein 12.20%, gross fat 5.90%, sugar 5.30%, starches 26%, gross fiber 22%, gross ash 8.90%, digestible energy 14.7Mj/kg, humidity 38%, lysine 9gr/kg, threonine 7.20 gr/kg, methionine 2.80gr/kg, calcium 1%, phosphorus 0.40%, sodium 0.5%, magnesium 0.52%.

BASIC WORK		HARD WORK	
Weight	Consumption	Weight	Consumption
200 kg	1,5 kg	200 kg	2,2 kg
400 kg	2,5 kg	400 kg	3,5 kg
600 kg	3,5 kg	600 kg	4,5 kg

The recommended amounts will depend on the quality of the forage and the type of work.

### RaygrassTop

Natural Forage

- Specific high protein forage for horses in competition.
- Very good source of energy and highly digestible protein.
- Contains vitamin B6, which is essential for carbohydrate metabolism.
- Complementary protein for the development of muscle capacity.
- 4% of vegetable fats.
- Free of dust and spores.
- Enriched with Iron and Copper, which helps to strengthen joints.
- Also enriched with Vitamin E, known as “antioxidant vitamin” for its protective role of lipids in cell membranes and B group vitamins, which are essential and intervene in multiple metabolic functions such as digestion, skin and hoof formation.

#### Recommended for:

- All types of horses and ponies, especially lactating mares, in all disciplines.
- Animals prone to colic.
- Helps in weight gain and decayed hooves.
- Beneficial after colic and laminitis
- Decreases the probability of laminitis due to the low grain content.
- Horses with respiratory problems (**WITHOUT DUST AND SPORES**).

**Ingredients:** Fresh ryegrass haylage (Lolium mul.), vitamin and mineral complex.

**Composition:** Crude protein 13,50%, gross fat 3,90 %, sugar 2,80%, gross fiber 24,50%, gross ash 5,20%, digestible energy 10,75 Mj/kg, humidity 38%, calcium 0,57%, phosphorus 0,18%, sodium 0,08%, magnesium 0,61%.

MEDIUM WORK		HARD WORK	
Weight	Consumption	Weight	Consumption
400 kg	2-4 kg	400 kg	4-6 kg

Divide the dose into 2/3 daily doses.  
The recommended amounts will depend on the quality of the forage and the type of work.

# BASIC HAYLAGES

## EXTRA EQUINE CORN

- Whole plant from extra corn.

Insecticide y acarizide

- ✓ **Highly effective.**
- ✓ **With great residual and shock effect.**
- ✓ **For direct application in the surfaces to be treated.**

**Composition:** Acetamiprid 0,20%, D-Trans-Tetramethrin 0,10%, piperonyl butoxide 0,40%, bitter-tasting substance 0,0015, excipients 100%.

*For the control  
of flying and  
crawling insects*

# Caleyá<sup>®</sup>

## open & feed

In Caleyá we use cutting edge technology to produce our **fresh foods**. To offer products of the best nutritional quality, we need that the pack protect and guarantee the perfect conservation of every nutrients.

For this, we developed our unique and distinctive **open&feed** system characterized by:

- ✓ **Controlled atmosphere**  
Provides food security.
- ✓ **High pressure packaging**  
Lack of oxygen.
- ✓ **Exterior security lock**  
Total airtightness.
- ✓ **High Density Tricap Polyethylene**  
Barrier effect to oxygen.
- ✓ **Easy to transport**  
Easy to open.
- ✓ **Perfect conservation**  
18 months of validity.

# Frequently questions

## **I purchased my first Caleyá fresh feed, How do I use it in my horse?**

As with any change in diet, it is necessary to do it progressively, over 4 or 5 days, gradually mixing with your usual diet.

## **How many kilos should I feed my horse?**

The quantity of Caleyá you should give to your horse will depend of his activity level and physiological state, but also his body state, horse weight and type of feed used.

You can be guided by the dosage tables that appear in each product sheet, in addition consult your veterinarian.

## **How should I open the open&feed pack?**

We recommend opening the package from the top and removing the exact amount to consume in each ration, closing the bag after use.

## **How long does the unopened package last? And once opened?**

Thanks to the **open&feed** packaging, we guarantee the perfect conservation of the product for 12 months, as long as it is not opened or perforated. Once opened, we recommend consuming as soon as possible, depending on the product.

## **Can I still using my usual complete food at the same time that I'm using Caleyá?**

Yes, the Caleyá foods doesn't have any type of negative interaction with the concentrated food, contrariwise: favor the digestibility of nutrients in concentrates.

## **Can Caleyá produce colic?**

No. The Caleyá fresh food incorporate Lactobacillus probiotics and Bifidobacterias which help to completely digest the food and prevent colic problems.

Every Caleyá foods are very healthy.

## **What can happen to my horse if he ingests more than the adequate amount?**

Absolutely nothing. The Caleyá foods are very rich in fiber and they are designed specially for horses.

# Did you know what...?

## Haylage

- Haylage has a higher nutritional content and better hygienic quality than traditional hays.
- It provides 25-30% more energy than hays and more digestible fiber.
- Does not contain spores that can irritate the horse's airways.
- Its freshness prevents dehydration and makes it a very appetizing forage.
- The use of specific haylages for horses is widely extended in countries like the United Kingdom, Holland, Germany, France,...

## Forage is the foundation of horse health

- The forage must be of the highest quality, as apart from its nutritional function, it stimulates the intestine, maintaining good intestinal health.
- The quality of the forage and its digestibility is determined by the lignin. The more mature the plant has been cut, more lignin will have and worse quality it will be.
- Caleyá audits its harvesting process to ensure maximum digestibility forages.

## Starches

- It is mainly used as a source of energy during physiological states such as lactation, gestation, growth, or to be able to exert muscle contraction in working and sport horses.
- The Caleyá products contain starch processed through fermentation that pre-digests the starch and breaks its structure to facilitate digestion and assimilation.

## Aminoacids

- Amino acids are practically beneficial to all of the horse's vital processes.
- They are mainly needed for the formation and repair of muscle tissue.
- Amino acids that cannot be produced by the body, such as lysine, are considered essential and should be included in the diet.
- Caleyá incorporates the main amino acids in its products: Lysine, Methionine, Threonine,...

## Protein

- The horse's protein requirement depends on its physiological state and activity level.
- The quality of protein in the diet is determined by the amount and proportion of essential amino acids it offers.
- Protein breakdown produces heat and the heat factor can be beneficial in a cold environment, but it can also contribute to excessive sweating and possible heat stroke during hard work, especially in warmer climates.
- The Caley products keep your horse focused and calm, avoiding over-excitement.

## The intestinal flora

- A horse's healthy intestinal microflora improves its health, appearance and ability to use nutrients.
- Reduces the incidence of laminitis, colic and other diseases.
- Every Caley products incorporate Lactobacillus and Bifidobacteria, excellent probiotics for good digestive health.

## Fats

- Fats are an excellent source of slow-release energy.
- Some types of fat are an essential part of the diet, including omega-3 and omega-6.
- They are important for their anti-inflammatory properties and for their role in immune function.
- Caley only uses top quality vegetable fats such as corn germ, high oleic sunflower and flaxseed.

## Lactobacillus and Bifidobacterias

- Lactobacillus Plantarum is a very beneficial bacterium that can live in the intestine and is able to maintain the barrier to pathogenic microorganisms that cause disease.
- It works to maintain a balance between beneficial and harmful bacteria, while helping with digestion and optimizing vitamin and mineral levels. Improve digestion, reducing colic, laminitis and other problems.
- Boost immunity and improve overall health.
- In Caley we are pioneers in the application of Lactobacillus and Bifidobacteria in our foods.

# Sobre nuestros productos

## Sobre nossos produtos

Los productos **Open&Feed Caleyá** han sido elaborados cuidadosamente con el fin de aportar a su caballo todos los nutrientes necesarios mediante forrajes frescos, henolajes y cereales 100% naturales, sin grasas animales y libres de polvo.

Utilizamos ingredientes de alta digestibilidad, completamente naturales, e incluyen probióticos que ayudan al rendimiento de su caballo, reforzando el sistema inmunológico y flora intestinal del caballo, previniendo problemas de cólicos y laminitis.

Alimentos saludables: sus ingredientes están cuidadosamente seleccionados, buscando la mayor digestibilidad y el mayor aporte nutricional.

Para ofrecer productos de la mejor calidad nutricional, necesitamos que su envasado proteja y garantice la perfecta conservación de los nutrientes.

Para ello hemos desarrollado nuestro único y distintivo sistema open&feed, caracterizado por:

- ✓ Atmósfera controlada, proporcionando seguridad alimentaria.
- ✓ Envasado en alta presión, con ausencia de oxígeno.
- ✓ Cierre de seguridad exterior para garantizar su hermeticidad total.
- ✓ Polietileno tri-capa de alta densidad
- ✓ Perfecta conservación, fácil de transportar y fácil de abrir.

**Empleamos tecnología de vanguardia para producir nuestros alimentos.**

Os produtos **Open&Feed Caleyá** foram cuidadosamente elaborados de forma a fornecer ao seu cavalo todos os nutrientes necessários através de forragens frescas, silagem e cereais 100% naturais, sem gorduras animais e isentos de pó.

Utilizamos ingredientes altamente digeríveis e totalmente naturais, e incluímos probióticos que auxiliam no desempenho do seu cavalo, fortalecendo o sistema imunológico e a flora intestinal do cavalo, prevenindo problemas de cólica e laminite.

Alimentação saudável: seus ingredientes são cuidadosamente selecionados, buscando a maior digestibilidade e o maior aporte nutricional.

Para oferecer produtos da melhor qualidade nutricional, precisamos que as suas embalagens protejam e garantem a perfeita preservação dos nutrientes.

Para isso, desenvolvemos nosso sistema único e distinto de alimentação e abertura, caracterizado por:

- ✓ Atmosfera controlada, proporcionando segurança alimentar.
- ✓ Embalagem de alta pressão, com ausência de oxigênio.
- ✓ Fecho de segurança externa para garantir hermeticidade total.
- ✓ Polietileno tri-camada de alta densidade
- ✓ Conservação perfeita, fácil de transportar e abrir.

**Usamos tecnologia punta para produzir os nossos alimentos.**

# Carmen Alanís

Carmen Alanís Espigares, nació en Dos Hermanas (Sevilla) en noviembre de 1992 en el seno de una familia con larga tradición ecuestre.

Con sólo 21 años, la joven jinete sevillana se sitúa con un magnífico palmarés en el marco de nuestra equitación actual:

- ✓ 1ª Kur Young Riders en CDI\*\*\* de Toledo, abril de 2020, con Espía (Anglo-Hann).
- ✓ Vencedora en su categoría de los dos últimos Campeonatos de Andalucía (Córdoba 2011 y Montenmedio 2012).
- ✓ Medalla de plata en el Campeonato de España por equipos en 2004.
- ✓ Miembro del Equipo Español en los Campeonatos de Europa Junior, celebrados en Portugal en 2008.
- ✓ Ha actuado de manera consecutiva, con notables actuaciones, en las últimas ediciones en el CDI Toledo (2008-2013) y en el CDI del Sunshine Tour (2008-2013) donde alcanzó el 2º puesto en la Kur Young Riders.

## Su relación con Caleyá

Utiliza nuestro Haylage Raygrass Suave RS10.

- **La primera vez que usaste nuestros productos con tus caballos, ¿mostraron rechazo al forraje?**
  - De 3 caballos con los que probé, sólo a uno le costó los primeros días, luego sin problemas.
- **¿Cómo lo utilizas: mezclado con tus concentrados, con tu forraje habitual o como forraje único?**
  - Lo utilizo 3 veces al día: Por la mañana y por la noche mezclado con el pienso, y a medio día solo.
- **¿Podrías darnos una opinión personal sobre HAYLAGE de RAYGRASS SUAVE RS10?**
  - Me parece un aporte muy importante, desde que lo uso he bajado mi cantidad de forraje normal a una sola toma al día, y además hace que mis caballos coman más lentos y estén más tiempo entretenidos. Para llevar a concursos tiene un formato ideal.

# Diego Ventura

Diego Antonio Espiritu Santo Ventura, conocido profesionalmente como Diego Ventura, (Lisboa, 4 de noviembre de 1982), es un rejoneador y ganadero de toros bravos de origen hispano-portugués.

Está en activo desde 1998 y es líder del escalafón de la temporada 2019.

Es el rejoneador que más puertas grandes ha abierto en la plaza de toros de Las Ventas (Madrid) y el último en cortar un rabo en Las Ventas.

## Su relación con Caleya

Utiliza nuestro Haylage Raygrass Suave RS10.

- ¿Podrías darnos una opinión personal sobre HAYLAGE de RAYGRASS SUAVE RS10?

- Estoy muy contento. A los caballos les encanta, y la principal ventaja que veo es que les ayuda a comer mucho más despacio. Cuando pongo la ración a mis caballos les dura muchísimo más que a los caballos de los vecinos que no consumen este forraje. Todavía no llevo tanto tiempo usándolo como para certificar grandes cambios físicos o deportivos, pero la verdad es que empiezo a ver los caballos con más energía y con un aspecto más saludable.

# Juan Matute

Juan Matute Guimón es un jinete de doma clásica de 22 años que está seleccionado como uno de los jinetes que acudirá a los Juego Olímpicos de Tokio de este verano.

- ✓ 5ª Doma estilo libre individual en la Copa del Mundo de Doma FEI, Liga de Europa Occidental, Madrid. 25/11/2018.
- ✓ 10ª Doma estilo libre individual, en la Copa del Mundo de Doma FEI, Liga de Europa Occidental, Lyon. 01/11/2019.
- ✓ 7ª Doma estilo libre individual en la Copa del Mundo de Doma FEI, Liga de Europa Occidental, Madrid. 30/11/2019.
- ✓ 3ª Doma estilo libre individual en la Copa del Mundo de Doma FEI, Liga de Europa Occidental, Malinas. 29/12/2019.

✅ Gracias por vuestro apoyo. Gran marca de forraje internacional. Llevamos dos meses probando su producto y el cambio ha sido increíble. La temporada 2021 va a ser muy prometedora 😊👏

# Pedro Mateos María Gil Díaz

## Su relación con Caleyá

**Utiliza nuestro Haylage Raygrass Suave RS10.**

- **La primera vez que usaste nuestros productos con tus caballos, ¿mostraron rechazo al forraje?**
  - Ningún tipo de rechazo que hayamos experimentado hasta el momento, de hecho caballos que comían más lento o no comían mucho han empezado a comer mejor con este forraje.
- **Al ser un forraje fresco, ¿resulta fácil su manejo diario?**
  - Muy fácil, está muy bien empaquetado de esa forma en comparación con productos parecidos de otras marcas, de este modo no se ponen malos. También a la hora de realizar las raciones para los caballos es muy fácil, y se puede guardar para utilizar al día siguiente sin ningún problema

## Su relación con Caleyá

Utiliza nuestro Festu-Grass y Haylage Raygrass Suave RS10.

### - ¿Qué opinión tienes sobre Festu-Grass?

- Me gusta el formato con menos peso, es más manejable. Aunque quizás con 15 kg también sería bueno. Se lo comen muy bien y la fibra tiene un tamaño bueno, aunque cuesta un poco sacarlo del plástico. Personalmente me gusta pero tengo mis dudas si los clientes lo ven muy similar al heno de hierba sin envasar y prefieren utilizar el otro. Aunque para los concursos es una maravilla, me he llevado 10 paquetes para Vilamoura y los he metido en la vivienda del camión.

### - ¿Qué opinión tienes sobre Haylage Raygrass RS10?

- Me parece un producto muy interesante por el olor y la humedad, que lo hace atractivo para la gente. Igual que el Festu, cuesta un poco sacarlo del paquete pero este, si lo abres entero, salen trozos grandes fácilmente. A los caballos les gusta mucho y comen despacio durante mucho tiempo. A mi me gusta darlo en un cubo con el pienso o encima del heno o alfalfa.

# Israel Cantero

Jinete profesional de Saltos de Obstáculos a nivel Nacional e Internacional, con amplia experiencia deportiva:

- ✓ Técnico Equitación Nivel I
- ✓ Examinador de Galopes I.U., 4 os So, 4 op DC

- ✓ Integrou a equipa Portuguesa para o Campeonato europeu de Dressage-Aachen, Alemanha 2015

[www.Caleyá.es](http://www.Caleyá.es)

# João Moura

João António Brás de Moura, é um cavaleiro português, filho do cavaleiro João Moura.

Desde muito jovem começou a andar a cavalo e toureou pela primeira vez aos 7 anos na praça de touros de Monforte, sua terra natal.

Em maio de 2005, com apenas 16 anos, fez a alternativa na Arena de Nimes e confirmou-a em junho do mesmo ano em Las Ventas, Madrid.

Em maio de 2019, com seu cavalo Hostil, ele trouxe boas recordações aos fãs quando fez a famosa sorte "Mourina" pela primeira vez em praça, originalmente interpretada por seu pai, colocando toda a praça de pé.

João Moura Jr. é presença regular nas praças de touros de Portugal, Espanha, França e outros países fora da Europa.
